

# Intermediate Test 5

Stellenbosch Camp 2018

Time: 4 hours

1. The student lockers at Olympic High are numbered consecutively beginning with locker number 1. The plastic digits used to number the lockers cost 3 cents per piece. Thus, it costs 3 cents to number locker 9 and 6 cents to number locker 42. If it costs R206.91 to label all the lockers, how many lockers are there at the school?
2. Given the equation  $x^{2018} = y^x$ ,
  - (a) find all pairs  $(x, y)$  of solutions with  $x$  prime and  $y$  a positive integer;
  - (b) find all pairs  $(x, y)$  of positive integers satisfying the equation.
3. Consider two circles  $\Gamma_1$  and  $\Gamma_2$  that intersect at points A and B. Let  $l$  be a line tangent to circles  $\Gamma_1$  and  $\Gamma_2$  at  $S$  and  $T$ , respectively. Lines  $AB$  and  $ST$  intersect at point  $M$ . Furthermore line  $BT$  intersect circle  $\Gamma_1$  again at point  $R$ . Let the intersection of  $MR$  and  $SB$  be  $X$  and the intersection of  $TX$  and  $RS$  be  $C$ . Prove that  $CB$  and  $ST$  are parallel.
- 4.
5. Determine the number of ways to choose five numbers from the first eighteen positive integers such that any two chosen numbers differ by at least 2.
- 6.
